California Lottery Joins Statewide Problem Gambling Awareness Effort in “Bringing Gambling Disorder to Light”

SACRAMENTO – Problem Gambling Awareness Month (PGAM) is nationally recognized during the month of March and is designed to increase public awareness of problem gambling and the availability of treatment and recovery services. This year, the theme is “Bringing Gambling Disorder to Light” where responsible gaming advocates including the California Lottery (Lottery) join the California Office of Problem Gambling (OPG) to promote the state’s Problem Gambling Helpline (1-800-GAMBLER). The OPG provides free confidential treatment services to individuals impacted by problem gambling through the Problem Gambling Helpline, texting SUPPORT to 53342 or visiting 800gambler.chat. The Lottery supports PGAM through campaign advertisements on social media, newspapers, radio, and on its draw game tickets. Responsible Gambling Guidelines brochures are also available at more than 23,000 Lottery retail locations.

Gambling disorders can contribute to poor mental and physical health, financial troubles, and problems with loved ones. The PGAM campaign highlights that it is never too late to seek free and confidential help provided by OPG. Since 2010, OPG’s California Gambling Education and Treatment Services program, has provided treatment to thousands of individuals who have suffered negative impacts due to a gambling disorder. Treatment services may include brief interventions, one-on-one counseling, and even residential care. All treatment services are provided by licensed mental health providers trained in the treatment of gambling disorders.

As a recipient of the highest responsible gaming recognition from the World Lottery Association, the Lottery continues to ensure that responsible gaming considerations are part of its daily operations and programs. The California Lottery's mission is to provide supplemental funding to California public schools, including kindergarten and grades 1-12, community colleges, the California State University, the University of California, and other California public educational entities. The funds the Lottery transfers to public education total approximately \$1.8 billion for fiscal year 2018-19, which amounts to a modest percentage of education's overall budget. However, this funding is largely non-discretionary, meaning schools can use this for important, yet unfunded instructional programs they would otherwise not afford. During the same period the Lottery generated almost \$7 billion in sales, more than 95% of which goes back to the community in the form of prize payments, retailer commissions and bonuses, and contributions to education. The California Lottery urges its customers to play responsibly. Problem gambling resources are available to anyone at 1-800-GAMBLER.
